

CodeXX DTDK

Privacy Notice under arts. 13-14 GDPR (Reg. EU 2016/679) — v1.0 (English)

Last updated: 27 June 2026

1. Data Controller

The Data Controller is **William Karol Di Cioccio**, a sole trader registered under VAT no. IT02224180667, based in Italy. For any matter regarding the processing of personal data, contact the Controller at: **legal@codexx-dtdk.com**.

2. Core Principle: the Software Runs Locally

CodeXX DTDK is designed to run predominantly on the user's device. The Software does NOT transmit to the Controller or to any third party the user's source code, processed content, or any telemetry or usage data.

The only network communications made by the Software are limited and described in Article 4 below (license activation and verification, update downloads, security attestation verification). Outside those communications, the Software operates offline.

3. Data Categories, Purposes and Legal Bases

The Controller processes the following categories of personal data:

Purpose	Data	Legal basis	Retention
License management and activation	Email, license data, machine fingerprint (hash)	Performance of contract (art. 6.1.b)	Email & license data: license term + 12 months. Fingerprint: license term + short technical tail
Linking purchase to license	Email, Polar order ID	Performance of contract (art. 6.1.b)	License term + 12 months
Support and contact	Email, content of communications	Contract / legitimate interest (art. 6.1.b/f)	Up to 24 months from last contact
Enterprise Inquiry	Company and contact data	Pre-contractual measures (art. 6.1.b)	Up to 24 months or duration of relationship
Newsletter (if enabled)	Email	Consent (art. 6.1.a)	Until consent withdrawn
Design partner / beta	Contact data, feedback	Consent / contract (art. 6.1.a/b)	Program duration + 12 months
Site statistics	Aggregated navigation data	Legitimate interest (art. 6.1.f)	Aggregated/anonymous, max 12 months

Note on billing: purchases are handled by Polar acting as Merchant of Record. Polar is the seller of record and independently processes the end customer's payment and billing data as controller. The Controller does not receive the customer's full billing data, only reports and payouts: for tax purposes the Controller invoices Polar, not the individual user. See Polar's privacy notice for the processing of payment data.

Note on the machine fingerprint: for license verification, the Software generates a machine identifier in the form of a SHA-256 hash (64 characters) of a system identifier. This is pseudonymized data: it is not reversible to hardware specifications or to the hostname, but uniquely identifies the installation solely for license-enforcement purposes. It is retained for the license term plus a short technical tail, not for tax purposes.

4. Software Network Communications

4.1 License activation and verification

For paid licenses (Pro, Team) and for Community license verification, the Software contacts the Keygen licensing service in the following cases: (a) at activation; (b) lazily, at the first run after a time window (TTL) elapses — 7 days for Community, 14 days for Pro and Team. There is no background process or periodic heartbeat.

In such communications the Software transmits only: the license key, the machine fingerprint (SHA-256 hash) and the product identifier. No email, telemetry or IP address beyond what is inherent to any HTTPS request is transmitted. Signed-key licenses (Ed25519) are verified locally with no network communication.

4.2 Updates and security attestation

On explicit user action, the DTDK Manager may download updates and verify the Sigstore attestation of releases. These operations involve communications with the official distribution channels and the Sigstore transparency infrastructure.

5. Recipients and Processors

To provide its services, the Controller relies on suppliers acting as processors (art. 28 GDPR):

- **Keygen** — license management and verification. Processes the license key, machine fingerprint and product identifier. Keygen retains validation records and associated machines.
- **Polar** — Merchant of Record for payments. Acts as independent controller for payment and billing data, which it is responsible for collecting, handling for tax purposes and retaining.
- **Vercel** — website hosting and aggregated navigation statistics (Vercel Analytics), which does not use profiling cookies.
- **Email provider** — management of mailboxes on the @codexx-dtdk.com domain (legal@, support@).
- **Resend** — delivery of transactional emails and the newsletter (where enabled).

The Controller does not sell or otherwise share users' personal data with third parties for marketing purposes.

6. International Data Transfers

Some suppliers (in particular Keygen, Polar and Resend) may process data on cloud infrastructure located outside the European Union, including the United States. Such transfers comply with Chapter V GDPR, on the basis of Standard Contractual Clauses (SCC) approved by the European Commission or other adequate safeguards under the respective data processing agreements.

Because suppliers' cloud infrastructure may abstract the specific processing region, users are invited to consult the suppliers' notices for up-to-date details on processing locations and applied safeguards.

7. Retention Period

Data is retained for the periods set out in the table in Article 3. In summary: license data (email, license data) is retained for the license term and a reasonable period thereafter (typically 12 months). The machine fingerprint is retained for the license term and a short technical tail. Ten-year tax and accounting obligations concern documents of the relationship with Polar (Merchant of Record), not the billing data of individual end users, which is processed by Polar. Consent-based data is retained until consent is withdrawn. Contact and support data is retained as long as needed to handle the request and a reasonable period thereafter.

8. Rights of the Data Subject (GDPR)

As a data subject, the user has the right, under arts. 15-22 GDPR, to:

- access their personal data and obtain a copy;
- obtain rectification of inaccurate data or completion of incomplete data;
- obtain erasure (right to be forgotten) in the cases provided for;
- obtain restriction of processing;
- object to processing based on legitimate interest;
- receive their data in a structured format and port it to another controller (portability);
- withdraw consent at any time, without affecting the lawfulness of prior processing.

To exercise these rights, write to legal@codexx-dtdk.com. The user also has the right to lodge a complaint with the Italian Data Protection Authority (Garante, www.garanteprivacy.it) or their local supervisory authority.

9. California Privacy Rights (CCPA/CPRA)

This section applies to residents of California, USA, under the California Consumer Privacy Act as amended by the California Privacy Rights Act (CCPA/CPRA).

9.1 Categories collected and purpose

In the past 12 months the Controller collects only the following categories of personal information: identifiers (email), commercial information (license and order reference), and a device identifier (machine fingerprint hash). This information is collected to provide and verify the license, handle purchases (via Polar) and provide support. The Software does not collect the user's source code, processed content, or usage telemetry.

9.2 No sale or sharing

The Controller does not sell and does not share personal information within the meaning of the CCPA/CPRA, and does not use it for cross-context behavioral advertising. No financial incentive is offered in exchange for personal information.

9.3 Sensitive personal information

The Controller does not collect sensitive personal information as defined by the CPRA. The machine fingerprint is a pseudonymized device identifier used solely for license enforcement and is not used to infer characteristics about the user.

9.4 California rights

California residents have the right to: know the categories and specific pieces of personal information collected; request deletion; request correction; opt out of sale/sharing (not applicable, as the Controller does not sell or share); and not receive discriminatory treatment for exercising these rights.

To exercise these rights, contact **legal@codexx-dtdk.com**. The Controller will verify the request through the email associated with the license. An authorized agent may submit a request with proof of authorization. The Controller does not discriminate against users who exercise their rights.

10. Cookies and Statistics

The site uses technical cookies necessary for operation. For navigation statistics the Controller uses Vercel Analytics, which collects aggregated, anonymous usage data without profiling cookies and without tracking users across sites. No third-party marketing or profiling cookies are used. Should this change, this notice will be updated and, where required, prior consent obtained.

11. Nature of Provision

Provision of the data necessary for license management, purchase and billing is mandatory to use the paid services: failure to provide it makes license activation and management impossible. Provision of data for the newsletter, design-partner and beta programs is optional and consent-based.

12. Changes to this Notice

The Controller may update this notice to reflect regulatory or operational changes. The current version is always published at codexx-dtdk.com/privacy with the date of last update. Material changes will be adequately notified.
